2021 FIREARMS CATALOG

YOU CAN ALWAYS
COUNT ON A BERETTA.
WE PUT ALL OF OUR HEART,
OUR MIND, THE EXPERIENCE,
AND THE WILL TO GIVE YOU
ALWAYS SOMETHING NEW,
SURPRISINGLY NICE,
SUPER RELIABLE,
THAT WILL GIVE YOU JOY
EVERY TIME YOU USE IT.

WELCOME TO BERETTA,
WHERE 500 YEARS OF TRADITION
GO HAND IN HAND WITH THE MOST ADVANCED
TECHNOLOGIES TO CREATE
PRODUCTS THAT ARE UNIQUE.

FOR SOME IT'S A GENTLEMEN'S HUNT,
FOR SOME IT'S HANGING OUT WITH BUDDIES.
FOR SOME IT'S A BIG FAMILY,
FOR SOME IT'S A JUST A CREW.
FOR SOME IT'S AN AFTER-WORK GROUP,
FOR SOME IT'S LIKE AN ALUMNI NETWORK.
FOR SOME IT'S BEING IMMERSED IN NATURE,
FOR SOME IT'S SAVORING ITS MOST AUTHENTIC TASTE.
FOR SOME IT'S A CLIQUE OF CONNOISSEURS,
FOR SOME IT'S A 1 MILLION CLICK COMMUNITY ON FACEBOOK.
FOR SOME IT'S A WOMAN THING,
FOR SOME IT'S A FATHER AND SON THING.

BUT ALL TOGETHER, THESE PEOPLE MAKE UP
THE LARGEST FAMILY OF HUNTERS THAT EVER EXISTED.
BECAUSE IT STRETCHES BACK 500 YEARS,
RIGHT TO THE START OF THE BERETTA DYNASTY.
...IT IS THE BERETTA TRIBE.

BE PART OF THE

#BERETTATRIBE

686 SILVER PIGEON I

686 Silver Pigeon I

The 686 Silver Pigeon I is Beretta's most popular over and under shotgun of all time. Based on the superb 680 platform, with its unmistakable low, slim action and legendary, ultra reliable mechanism; it won the hearts of shooting enthusiasts the world over.

The new version incorporates the perfect ballistics of Beretta's highly reputed Steelium Optima Bore HP barrels. It also features a more defined and lustrous floral engraving, which is further enhanced with images of grapes on the vine and the iconic Beretta Three Arrows logo on both side of the action.

Available in all calibers; 12, 20, 28 and .410; as well as in Sporting version, with or without Beretta's adjustable B-Fast stock. All of which combines to make the 686 Silver Pigeon I the most elegant, well-balanced and quick-to-shoulder, factory-made shotgun in the world.

686 Silver Pigeon I Vittoria

The Vittoria series is the first Beretta's shotgun range specifically designed for women. Vittoria shotguns feature a dedicated ergonomics, suited to those with a shorter stature, to ensure a smooth, comfortable and precise handling. These guns are fitted with a shortened, semi-Montecarlo style stock, have a reduced pistol grip and additionally are completed by a 1 mm checkering, derived from the premium guns, beneficial for smaller hands.

687 Silver Pigeon III

THE BEAUTY OF A PERFECT SHOT

The 687 Silver Pigeon III shotgun represents an elegant evolution of the Silver Pigeon I, designed to meet the needs and desires of shooters looking for the reliability and minimal maintenance requirements of the 680 platform, presented with attractive aesthetics and a superior wood finish.

The fine engraving is made with state-of-the-art 5-axis laser technology and is embellished by a special sparkle in the bas-relief areas, which creates a pleasant contrast effect. The floral motifs and evocative game scenes are highlighted with pheasants and partridges.

The exquisite gloss finish enhances the grain of the stunning class 2.5 wood, protects it from rain and improves longevity. All these features are combined with the excellent ballistics guaranteed by the Steelium Optima Bore HP tri-alloy steel barrels.

687 EELL Diamond Pigeon

687 EELL Diamond Pigeon Game scene

687 EELL Diamond Pigeon Scroll

The exceptionally strong, low-profile receiver is elegantly adorned with exquisite game scene and intricate scroll engravings, made with the best in class premium laser engraving technology.

The stock and forend are superior quality walnut embellished with hand cut chequering and lustrous gloss finish, demonstrating how improved performance and refined beauty can be perfectly matched.

THE 9 REASONS TO CHOOSE THE BERETTA SEMI-AUTO TECHNOLOGY

1 PERFECT PATTERNS ON EVERY SHOT.

The ingredients of the great accuracy of the Beretta Steelium barrels are: the exclusive tri-alloy Beretta Steel (Ni, Cr, Mo), the deep drilling, the cold hammering process and the vacuum distension. Every OptimaBore HP barrel profile has been specifically designed and tested to provide perfect accuracy with every type of shells: lead, steel and steel High Performance.

2 THE BEST RECOIL REDUCTION.

Kick-Off, Kick-Off Plus and Kick-Off Mega ensure you up to 70% recoil reduction giving you more stability, comfort and control for faster target acquisition. More comfort for you, especially when you enjoy shooting hundreds of shots in a single day, and enhanced durability.

3 UNBELIEVABLE RELOADING SPEED (+36%).

The Beretta gas-operated system is fast like an eye's blink. That's why it's called B-Link. The power of the gas-system, combined with the precision of the rotating bolt, ensure you a fast, reliable and smart cycling. You can spend all your magazine's cartridges before the 1st round touches the ground.

4 ALL-LOAD PROVEN RELIABILITY, FROM 24 G. TO 64 G.

Beretta gas-operating system B-Link is world's most reliable system. The closing force is stronger because, when the reloading cycle begins, the energy available to unlock the bolt is significantly higher. Higher energy when opening allows higher closing force, preventing the bolt to unlock when it is not supposed to do it.

5 COMFORT AND EASY TO ASSEMBLE.

The MicroCore® pad is softer than gel, lighter than rubber and perfectly slipping. It's available in several dimensions to customize your length of pull. The magazine cap allows a quicker and better safety check on the shotguns magazine. The B-Lok cap, the magazine cap exclusive to Beretta, ensures a perfect and secure closing with just 60 degrees of rotation instead of multiple turns.

6 CLEANER THAN EVER AND EASIER TO CLEAN.

With B-Link, the only weak point of the gas-operating system has been practically reduced to zero. The re-engineering of gas ports and the systematic reduction of all the mechanical frictions reduce dirt to the minimum terms. You will experience the lowest maintenance need ever, and a smart, easy, fast and secure cleaning.

7 LOWEST MUZZLE JUMP.

Beretta semi-auto shotguns give you the lowest muzzle jump ever combining the stunning recoil reduction of the Kick-Off devices with the unique ballistic features of the Steelium OptimaBore HP barrels. More control after each shot, better performance for each next one.

8 ERGONOMIC AND EASY TO OPERATE.

The extended bolt handle and bolt release low profile lever allow for easier manipulation during the coldest and rainiest days. An enlarged loading port facilitates an easier and quicker reloading. The new extended lifter avoids thumb bite or glove catch while loading the gun.

9 DESIGNED FOR THE FUTURE, NEVER FORGETTING TRADITION.

The Beretta in-house design team works every day to match design with functionality, giving you original and aesthetically beautiful, simple solutions that optimize the shape, weight and ease of use.

A300 Outlander

A300 Outlander Silver

A300 Outlander

The A300 Outlander is the latest evolution of Beretta's A300-series gas-operated semi-auto shotguns, which have been sold to millions of hunters and sportsmen around the world. And there's a reason for their popularity: unbeatable performance as well as great value out of the box.

A400
LITE

A400 Lite Synthetic

A400 Lite Synthetic LH

The Beretta A400 Lite is a hunting shotgun that does it all, and that doesn't mind playing hard and getting dirty.

It's a 3" semi-auto shotgun combining the Kick-Off Plus shock absorption, the unrivalled Beretta Steelium barrels and a great package of smart, lightweight polymeric solutions.

Fast, versatile, light and low-recoiling, the A400 Lite Synthetic is also self-cleaning, requiring much less maintenance than you can expect.

A400 Xtreme Plus Prairie True Timber DRT

Xtreme preparations, Xtreme conditions, Xtreme expectations. The new A400 Xtreme Plus is built to go wherever your hunt takes you. Engineered to be the softest-shooting, most reliable 3.5" waterfowl shotgun out there, and to withstand the toughest waterfowl environments.

It has the best recoil and muzzle rise reduction system in the world: the Kick-Off Mega, combining 3 hydraulic shock-absorbers and return springs to reduce recoil up to 70% and the B-Steady system, avoiding the annoying sliding of the nose piece on the cheek, to let your face perfectly firm on the stock and never lose the line of sight. It features Beretta's exclusive Steelium Plus barrels, providing the best possible patterning from all hunting loads. An extended charging handle and bolt release from the factory allow for easier manipulation during the coldest and rainiest days. An enlarged loading port allows for ease of loading.

The new A400 Xtreme Plus shoots always, shoots everything and shoots even better!

687 Silver Pigeon III Sporting

THE BEAUTY OF A PERFECT SHOT

The 687 Silver Pigeon III shotgun represents an elegant evolution of the Silver Pigeon I, designed to meet the needs and desires of shooters looking for the reliability and minimal maintenance requirements of the 680 platform, presented with attractive aesthetics and a superior wood finish.

The fine engraving is made with state-of-the-art 5-axis laser technology and is embellished by a special sparkle in the bas-relief areas, which creates a pleasant contrast effect. The floral motifs and evocative game scenes are highlighted with pheasants and partridges.

The exquisite gloss finish enhances the grain of the stunning class 2.5 wood, protects it from rain and improves longevity. All these features are combined with the excellent ballistics guaranteed by the Steelium Optima Bore HP tri-alloy steel barrels.

690

690 Black Edition Sporting

690 Sporting and Trap are the competition over and unders to make your quantum leap in shooting performance.

Thanks to the Steelium barrels and to the outstanding balance, the 690 competition shotguns provide accuracy, ease of handling and perfect control. Exactly what you need when you start aiming to your first 25.

Model	Gauge	Chamber (mm)	Barrel (cm)	Rib (type)	Chokes (type)	Accessories	Drop (mm/mm)	Cast	Forend

694

694 Sporting

694 ACS (B-Fast)

694 is the over and under platform designed specifically for clay shooting, and with a precise objective in mind: to help shooters increase their success rate. Thanks to a meticulous mechanical and ergonomic design process, the 694 is perfectly balanced, natural and immediate when shouldering. The shape of the action and the stock provide increased field of vision, while the new forend iron system allows to maintain the opening load constant over time, and the Steelium Plus barrels guarantee a dense, uniform pattern every time.

In addition to the Sporting and Trap version, the 694 is now available also in Down-The-Line, ACS (with adjustable top rib), Vittoria and Pro version (with adjustable TSK stock).

Model	Gauge	Chamber (mm)	Barrel (cm)	Rib (type)	Chokes (type)	Accessories	Drop (mm/mm)	Cast	Forend

694 Pro Sporting	12	76	71-76-81	10x8	OCHP	5 Chokes	35/50 - 35/55	RH-LH	Schnabel-Rounded

694PRO

The 694 is now available in Pro Version with TSK fully adjustable stock, adapting to the anatomy of the shoulder and shouldering system of all athletes. Designed and tested in collaboration with the Beretta Shooting Team, 694 is the new over and under platform designed specifically for clay pigeon shooting, and with a precise objective in mind: to help shooters increase their success rate. Thanks to a meticulous mechanical and ergonomic design process, the 694 represents a perfectly balanced over and under competition gun. Natural and immediate when shouldering, it features a precise swing and it is easy to control. The new shape of the action and the stock provide increased field of vision, while the new forend iron system allows the user to maintain the opening load constant over time, and the Steelium Plus barrels guarantee a dense, uniform pattern every time. The slim, modern design lends the 694 a “racing” feel, for a bold, winning look.

DT 11

DT11 Sporting

With DT11, balance, power and precision are in your hands, together with outstanding control and perfect trigger pull. The innovative Steelium PRO barrels ensure great pattern and reduced muzzle raise, while the wide receiver improves stability and ease of handling. The B-Fast adjusting devices provide the best ergonomics ever.

DT11 GOLD

DT11 Gold Sporting

Created to celebrate the DT11's many successes, not least the medals won at the Olympics! The DT11 Gold is a limited-edition version of Beretta's spectacular competition shotgun. The silver receiver is embellished with gold-plated decorations; the familiar blue line around the action is replaced with a gold-plated version, as is the iconic trident logo on the bottom of the receiver. The fences are embellished with a repeated engraving of the word 'gold' forming a textured finish that reduces the light reflection when shooting.

The DT11 Gold has been made in three specifications: with only 250 pieces available for Trap, 75 for the skeet, 200 for the Sporting and 200 for the Compak Sporting; all limited edition shotguns are numbered on the underside of the receiver.

DT11 Black Edition EELL Sporting

The EELL version of the DT11 Black Edition brings the use of carbon fiber to levels never reached before in the firearms world. In addition to the top rib, the trigger plate, and the trigger group, the Beretta DT11 Black Edition EELL over and under shotgun also features carbon fiber trigger guard and two innovative long side plates, in which the engraving gives way to the characteristic carbon fiber twill texture.

The stock, made of selected grade 4 walnut wood, is available in an adjustable, fixed or headed version.

The oil finishing provides the wood with higher water resistance. The hand made 1 mm checkering gives the stock a more refined look and a firm and comfortable grip.

1301 Comp

1301 Comp

The Beretta 1301 Comp semiauto shotgun is designed to win tactical competitions right out of the box. Combining the technology of Beretta's best sporting shotguns with the requirements of the most demanding tactical shooters, it cycles faster than the other competition shotguns, handles like a dream and has oversized controls for super-easy operation.

It is available in two barrel lengths (53,5 and 61 cm) and its receiver is drilled and tapped for rail mounts, so that it can be equipped with optics or tactical aiming devices without any gunsmithing. And thanks to its Optimabore HP interchangeable choke system, it can also be adapted for other uses and will always perform like a Beretta.

1301 Comp PRO

1301 Comp Pro

After gaining the podiums of the Shotgun World Championships with its incomparable cycling speed, the 1301 Comp evolves in the Pro version, incorporating the improvements suggested by the multi-rated Beretta shooters. With the comfort, stability and ease of shouldering of its stock, its super-fast, safe and easier loading system, the enlarged bolt release button and bolt handle and the Beretta by Tony System extended magazine for 10 + 1 cartridges, the 1301 Comp Pro is today the most competitive platform for practical shooting, already in its out-of-the-box configuration, yet allowing further personalization, so sought after by the most demanding shooters.

APX

APX Tactical

Specifically designed for military and law enforcement operators, the APX has been put through extensive testing and evaluation by professionals. The result is a pistol that delivers superior performance in durability and reliability, ergonomics, trigger, and modularity. Utilizing a removable, serialized chassis frame, the APX can be easily modified with replaceable grip frame housings and it is simple to disassemble and maintain. Each APX comes with 3 interchangeable back straps so users can best fit their hands and preferences. The APX's aggressive full length slide serrations make slide manipulations easy under any conditions. To accommodate right or left-handed use, the APX's magazine release button can be easily reversed, and the slide stop is ambidextrous. The APX's trigger breaks at 6lbs and has a clear tactile and audible very short reset. The APX truly is the ultimate striker fired pistol from Beretta.

APX

APX RDO

APX Combat

The APX RDO is an evolution of the APX full size featuring all the same modularity of the standard APX line with the addition of a factory slide cut to accept one of 4 different optic plates. At launch, the pistol plates support Mini-Red Dot Optics from Burris, Trijicon, Leupold, and C-More.

Also shipping with the pistol is a fixed blanking plate that covers the slide cut and allows the pistol to be used without optic mount.

The APX Combat incorporates all the features of the RDO version, offering in addition a factory installed 1/2x28TPI Threaded barrel.

Centurion

APX
Compact

APX
Carry

The APX Centurion, APX Compact pistols and APX Carry extend the proven APX Series to a concealed carry friendly size, for those who have a need to carry concealed but want similar handling characteristics to their duty pistols. All the pistols feature a removable serialized chassis allowing the frame to be easily modified. Replaceable backstraps are also available to further customize the pistol ergonomics. These compact pistols keep offering the core characteristics that you love from your APX: low bore axis, ambidextrous slide catch, reversible magazine release, aggressive slide serrations, and a really smooth trigger with a clear tactile and audible short reset.

Px4 Storm

Absolute durability, reliability, and ergonomics have made it the go-to choice for shooters around the world. Designed to meet the most stringent military standards of durability, the PX4 has been reported to fire well over 150,000 rounds with zero part breakage. The lines of the pistol are snag-free and make unholstering and reholstering easy and fluid. The pistol may be adapted to different hand sizes and shooting styles thanks to a modular design with interchangeable backstraps. The ambidextrous and reversible controls offer the possibility to easily train or shoot with either hand. Besides being one of the strongest actions available, the rotary barrel dissipates recoil away from the shooter's hand and greatly reduces muzzle jump, making it an extremely fast and accurate action. Disassembly is designed to allow for quick field stripping.

M9A3

M9A3 Black

M9A3 Black&Green

With the M9A3 semi-auto pistol series, Beretta has created a coming-together of all the tactical and functional features that today's combat professionals may require. From Vertec-style thin grip for instinctive pointability, to universal slide design convertible from safety-decocker to decocker-only, from a bevelled magazine well to oversize mag-release button, from a 3-slot built-in Picatinny rail to high-capacity capability for maximum firepower. These combat pistols were designed to be perfect for any tactical use, including home and personal defence, tactical competitions as well as duty carry in any condition.

M9A1
Compact Black

Developed to meet the demanding requirements of the US Corps, the M9A1 incorporates the established reliability and performance of the M9, with added features needed for the ever-changing missions of peacekeeping forces. Thanks to its accuracy, durability and versatility, it also makes a superb choice for personal or home defense as well as concealed carry. The M9A1 is built to be ultra-tough and always dependable. Besides the superior steels of which it is constructed, it also features a unique sand-resistant magazine and a special PVD coating. At the range, the M9A1 will impress you for its low recoil, as well as for its accuracy.

90 Series

92 FS

The Beretta 92FS has been setting the standards for best military, police and tactical pistol for over a quarter century.

The reason is that it was designed, and has kept evolving to be and remain the most accurate, durable and reliable semi-auto handgun on the market. Easy to use, absolutely safe and delivering impressive firepower, it remains the sidearm of allied forces the world over, as well as of countless police and law-enforcement agencies.

FUSION

The 92 FS Fusion Blue is a new Limited Edition, reinterpretation of the iconic 92FS. It's the result of a careful design aimed at creating the perfect balance between tradition and innovation. The name celebrates this "fusion" of different materials and the most modern technologies available with the craftsmanship that made Beretta Premium Guns so famous worldwide. The result is a gun with an extremely contemporary design and rich in fine details. The barrel, all the levers and screws are chromed and hand-polished, mirrored to create a contrast with the blue finish of the frame and the slide. Compared to military standards that require a 160 mm maximum H + L, the Fusion Blue expresses its highest level of accuracy in the selection and treatment of barrels, guaranteeing its H+L ranges from 60 to 70 mm. An exclusive series of only 100 pistols, 60 in caliber 9x19 and 40 in 9x21. Every pistol is numbered progressively and offers a truly exclusive detail: the pistol number coincides with its dedicated serialization.

FUSION

The Fusion Blue features a dedicated case in light gray carbon fiber, with internal Alcantara® lining and contrasting orange stitching. Personalized with the coined Pietro Beretta shield, it is equipped with a safety lock. The kit includes a second magazine, a cleaning kit with a light gray carbon fiber multifunction handle, a dedicated screwdriver to remove the exclusive screws of the grips and a congratulatory card in ferromagnetic steel with the serial number and the autograph by the President Franco Gussalli Beretta.

1301 TACTICAL

I301 Tactical OD Green

I301 Tactical Inox / Marine

The I301 is Beretta's gas operated semi-automatic shotgun engineered to be ultra-reliable and easy to use. Thanks to its compact size, it is ideal for negotiating tight spaces. It has all the features that a modern tactical shotgun should offer and it is easily adaptable to most users' needs, body type and shooting posture. Right out-of-the-box, the I301 Tactical features an oversized charging handle, large textured bolt release and an oversized reversible safety button. The integrated B-LINK gas operating system, featuring a cross tube gas piston, allows the I301 Tactical to cycle 36% faster than any other shotgun on the market. This also makes it ideal for 3-gun competitions.

CX4Storm

The Cx4 is a semiauto pistol-caliber carbine designed to give you the familiar controls of your favorite Beretta combat handgun. The operating handle, safety and magazine release are reversible and give you the opportunity to train or shoot right- or left-handed, while case ejection can also be switched from right to left. The length of pull is adjustable. Sights, lightning and other accessories can be easily mounted, thanks to the top rail, the retractable Picatinny rail and possibility to mount additional rails on the left, right and bottom. And after a day at the range, this carbine is a snap to take apart and reassemble, while its ultra-tough construction and surface treatment make it stand up to the hardest use.

ARX I00

ARX I60
Pistol

The ARX platform takes the concept of a modular rifle to futuristic levels, while maintaining a simple operation that makes it ultra-reliable. With ambidextrous controls, easily-replaceable barrel and virtually endless possibilities for customization and accessorizing, the ARXI00 is adaptable to any firing scenario and is perfect for today's most demanding tactical shooter. The ARXI60 is a .22 LR tactical training rifle that looks, feels and handles like its full-size counterpart.

ARX I60 Pistol	.22 LR	S	I	5	1700	480	211	80	290	Ambidextrous selector

BERETTA KICK-OFF SYSTEM

WORLD'S BEST RECOIL AND MUZZLE RISE REDUCTION

Kick-Off Mega is the most powerful recoil reduction system available today, ideal for 89 mm chambered shotguns, especially when you enjoy shooting high loads and hundreds of shots in a single day. It effectively combines 3 different devices that work synergistically, reducing the perceived recoil by up to 70%, ensuring greater stability, better control and faster target acquisition. Two hydraulic shock absorbers, similar to those used in the automotive and aerospace industry, positioned close to the rubber insert, together with return springs, effectively act on the first recoil peak. A third hydraulic shock absorber, inserted in the tie rod, acts on the second recoil peak caused by the impact of the slide against the receiver, further reducing the muzzle rise effect and the vibrations caused by the movement of the slide.

Kick-Off Plus consists of two elastomer shock absorbers, positioned close to the rubber insert and equipped with return springs, which effectively act on the first recoil peak, reducing its perception up to 40%. A third elastomer shock absorber, inserted in the tie rod, absorbs the impact of the slide against the receiver, reducing the second recoil peak, the muzzle rise effect and the vibrations caused by the movement of the slide.

Kick-Off is the first recoil reduction system developed by Beretta using hydraulic shock absorbers similar to those used in the automotive and aeronautical industries. It consists of two shock absorbers inserted close to the butt plate, completed by return springs, which effectively act on the first recoil peak, reducing the perceived recoil up to 60%.

A third elastomer shock absorber, inserted in the tie rod, acts on the second recoil peak caused by the impact of the slide against the receiver, further reducing the muzzle rise effect and the vibrations caused by the movement of the slide.

The **B-Steady** system divides the stock into two sections: stock and pistol. The point of absorption of the recoil is in an advanced position, integral with the pistol, which is free to move back, leaving the stock stable and avoiding the annoying sliding of the nose piece on the cheek. The face remains firm and perfectly steady on the stock, without ever losing the line of sight.

STEELIUM BARREL

THE BEST BALLISTIC PERFORMANCE ON THE MARKET

STEELIUM^{PRO} **TRIPLE CONE** about 450 mm *

CYLINDER SECTION

STEELIUM^{PLUS} **TRIPLE CONE** about 320 mm *

CYLINDER SECTION

STEELIUM **DOUBLE CONE** about 80 mm *

CYLINDER SECTION

The ingredients for the stunning performance of the Beretta **Steelium barrels** are: the exclusive tri-alloy Beretta steel (Ni, Cr, Mo), the deep drilling, the cold hammer forging, the vacuum distension and the 80 mm extended forcing cone. The inner profile of the OptimaBore HP barrels has been designed and tested to provide perfect accuracy with every type of shells: lead, steel and High Performance steel. This results in perfect patterns on every shot.

The **Steelium Plus** barrels have a triple forcing cone that reaches a length of 320 mm (in a 76 cm barrel). In **Steelium Pro** barrels, the length of the forcing cone is further extended, up to 450 mm (in 76 cm barrels). This progressive inner profile of the barrel provides smoother shot with reduced muzzle rise and guarantees perfect, dense and uniform patterns with any type of ammunition.

* The indicated lengths are based on 76 cm barrels.

LEGAL NOTES: while every effort has been made to make this catalog as complete and accurate as possible, changes may occur at any time in the illustrations, descriptions, colors shown, and technical specs listed. Beretta provides ongoing improvements to its products and consequently, all specifications can vary without notice.
